

## **If you are searching for a top-notch versatile Web Developer, my credentials may be of interest to you.**

I offer 9 years of **real-world** development experience in the web and design industry. I can create, build and deliver professional-grade web applications and web sites that are easy to use, easy to manage, and easily expandable. I can build the entire framework, create all the graphics and layout, organize all the display information and provide the programming code for the framework that can seamlessly be integrated with any back-end functionality and database connectivity.

I can create and provide professional-grade visual, interactive, and multimedia tools for screen and/or print presentations, build design solutions that support client business and communication objectives and supply design solutions using a variety of media and interactive technologies.

I can write, edit, manage, produce and source site content, improve site engagement through user management, document creation, QA & testing of new functionality, and perform routine site maintenance tasks.

My organization skills allows me to methodically and accurately scope out any project by size or complexity, documenting requirements, researching structural and navigational sequencing, outlining functionality and developing a design document to properly plan the project.

I have a profound experience in SharePoint on user Interface (UI) customizations, provide best practice solutions to utilize MOSS, configurations, cascading style sheets (CSS), JavaScript, or other appropriate technologies to implement UI customizations. I can work closely with customers to determine website/portal requirements, iteratively develop and implement according to defined requirements, and provide support for the site and related infrastructure. I can also act as a technical resource to users, customers, and other team members.

Lastly, I have a profound and deep understanding of the underlying mechanics of all PC based hardware and software configurations and functions that enable me to quickly function and adapt to any system, hardware installation, tool, or application.

The versatility of my skills allows me to accomplish a multitude of assorted tasks, and my attention to detail produces the highest quality of work as testified by my employers and clientele. I truly believe that I would be bringing the perfect blend of artistic creativity and technical expertise to any project or application. If my qualifications can be utilized within your organization, it would be a privilege to meet with you personally and discuss future possibilities.

Sincerely yours,

Ryan R. Marzan
